TREND SPOTTED

## Diffa's Low and Lush Floral Designs

At Diffa's [Dining by Design event](#), several designers crowned their tables with low arrangements of tightly packed florals. Here's a look at a few of the lush designs, which prominently featured shades of pink and green.

Five floral varieties comprised the long, low centerpiece of Mick Santiago's design for Market Square Chicago; Pink roses and artichokes appeared in the tightly packed arrangement on Room and Board's table; A low, green arrangement crowned the table that J.A.T.C. and Faux Design Studio designed for the Finishing Contractors Association.
